POOL CHECK™

Product	Description	Price
481335-12	Chlorine Check (3 in 1)	7.95
481341-12	Deluxe Check (4 in 1)	8.95
481339-12	Premium Check (5 in 1)	9.95
481336-12	Bromine Check (3 in 1)	7.95
481348-12	Copper Check (3 in 1)	11.95
481349-12	Phosphate Check	18.95
482341	Salt Check	5.95
481347-12	Total Dissolved Solids Test (TDS)	11.95
487999	18 Minute Bacteria Test	23.95

The three simple components of Pool Check™ Phosphate:

- Sample Vial
- Color Chart
- Test Strips

Step 1:
Dip strip into vial for **20 seconds** with up and down motion, making sure both test pads are in contact with sample.

Step 2:
Remove strip from vial, place sample vial on white spaces between the colors on the chart. Viewing vial from top, match to closest color. Complete matching **within 30 seconds**.

Dip and Read Test

Results in 20 seconds

Detects 0 - 2500 ppb

Part Number: 481349

WHAT IS GERANIOL?

Savvy folks have been planting geraniums in their window boxes for centuries, using the natural properties of the flowers to repel bugs. Today, the hard data exists that proves that the use of geraniums is more than a tradition passed down from generation to generation. Geraniol, a powerful ingredient extracted from geranium oil through a unique refining process, does indeed provide a natural – and extremely effective – insect repellent.

According to laboratory and field studies by the University of Florida in Gainesville, Geraniol, the active ingredient in BugBand insect repellent, has been proven effective in repelling a wide variety of insects, including mosquitoes, house flies, stable flies, horn flies, cockroaches, fire ants, fleas, gnats, dog ticks, lone star ticks, and no-see-ums.

The University of Florida developed and tested alternatives to synthetic pesticides over a 17-year period. As part of the testing process, which was headed by Dr. Jerry Butler in the Department of Entomology and Nematology, university researchers created and patented a device called an olefantometer, which duplicates human skin and gaseous conditions that attract biting and annoying insects.

Previous to the University's work, there was no hard data or scientific studies to document what effect, if any, geranium oil had on any specific type of insect. The team tested and retested more than 4,000 compounds, and Geraniol emerged as an effective means of repelling insects.

TOWELETTES

The BugBand towelette is a very handy, easy-to-use method of applying Geraniol insect repellent. The towelettes travel anywhere, are lightweight and take up very little space. Safe and effective, the towelettes allow for exact application of Geraniol lotion on exposed skin. They're ideal for using around your face or neck without over-applying. The towelettes can be folded and stored in the foil container for future use.

Towelettes repel mosquitoes, flies, gnats, no-see-ums and ticks!

WRISTBANDS

A good choice for recreational and lighter-duty applications, the BugBand wristband comes in multiple colors, including dark green, light green, blue, yellow, red, pink, and glow-in-the-dark. The vapors from the plastic BugBand wristband form a protective shield around the immediate area, keeping insects a safe distance away. While many repellents are easily diluted or rinsed off with swimming or perspiration, the wristband just keeps working, up to 120 hours. It's packaged in an innovative reusable plastic "pod" to store the wristband and it can be sealed between uses to preserve the active life of the product.

The plastic wristband is designed with a patented break-away strap that snaps if it becomes entangled. It can also be worn on belt loops, hatbands, pet collars, fastened in tents, attached to baby carriages or applied to other areas where insects could be a problem.

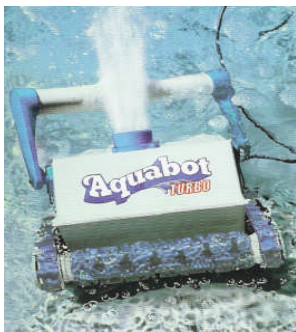

PUMP SPRAY LOTION

Perfect for when you need more heavy-duty protection, BugBand spray lotion does not contain any propellants, but relies on a highly effective metered pump sprayer to dispense a fine mist over the area to be treated. By spraying the BugBand liquid directly on clothing or skin, the Geraniol vapors form a protective barrier to deter blood-sucking insects from biting. It is ideal for uses around the ankles, wrist or neck, where insects tend to invade clothing. Use once for hours of insect protection.
