Laser Sand Filters

Features

- 16", 19", 22.5" and 25" models.
- **NEW!** Upper distribution system integrated into the dial valve and engineered to direct water evenly across the entire surface of the sand – up to 25 gpm/sq.ft. without sand migration or channeling.
- Underdrain with side-slotted laterals draws water evenly across the full diameter of the sand bed for higher flows, better filtration, longer cycles and more efficient backwashing. Features **heavy-duty, freeze resistant hub** and **easy service, snap-fit laterals**.
- **Deep, high-capacity sand bed** carries more debris and extends filter cycles.
- **Blow-molded tank** is corrosion-resistant, and UV-resistant.
- **Bottom drain** for winterizing and draining.
- **NEW!** **Non-Corrosive Resin Clamp** for simple installation and service of dial valve and filter components.
- **7-way Dial Valve** with sight glass, automatic air relief, and pressure gauge. The 7 functions include:

Filter Backwash Rinse Whirlpool Drain Test Winterize

In-Ground D.E. Filters **Astral DE Filters**

Clarity D.E. Filters

Our heavy duty filter tank is a unique combination of fiberglass lamination with a molded polyester resin, offering unsurpassed strength to resist high pressures and the rigors of infloor cleaning systems. The filter easily assembles/disassembles with a sturdy stainless steel band and sits atop a molded plastic base.

The internal manifold is injection molded ABS and features a curved grid design for maximum space efficiency. Filter connections are 2" standard to handle the modern pool's higher flow rates. Filters include air relief valve and pressure gauge. Filters available in 24, 36, 48 and 60 square foot filter area models.

CLEARWATER CARTRIDGE FILTERS

Waterway®

Large filtration, small footprint, and high flow; Clearwater Cartridge Filters incorporate wide-body filtration elements to give maximum filtration without sacrificing flow rate. Made of a durable glass-filled polymer, Clearwater cartridge filters provide years of trouble-free performance. Clearwater Cartridge Filters feature Waterway's Safety lock ring system to ensure safe operation and easy maintenance.

FEATURES

- Wide-body filtration system.
- Durable glass-filled polymer filter body.
- 10 year warranty on filter body.
- 1½" clean out drain on 1½" FPT – 2" on 2" FPT.
- Pressure gauge.
- Air relief plug.
- Automatic air bleed capability.
- Lid handle.
- 1½" FPT model has an internal check valve in outlet.

CLEAR WATER II DE FILTER

Waterway®

FEATURES:

- True Spiral Laminar flow for even disbursement of D.E.
- Automatic hydraulic regeneration
- High flow rate
- Modular grid system for easy maintenance
- 1 1/2" drain port on 1 1/2" FPT
- Flush-mounted pressure gauge
- Low-profile air relief plug
- Automatic air bleed capability
- Heavy-duty lid handle

True spiral laminar flow in an above ground filter, spiral laminar flow ensures even distribution of DE for maximum filtration. The Clearwater DE filter features automatic regeneration. Waterway's Safety Lock Ring system for safe operation and maintenance, and a ten year warranty on its rugged glass-filled polymer body.

WVD001	2" Multi-port valve with union connections	260.00

D.E. Filter sets a new standard of performance and features for pool filters. The only D. E. Filter on the market with 2 1/2" internal piping, improves flow and reduces system noise when using 2 1/2", 2", or 1 1/2" plumbing. From the lid with the "Multi-handle" design to the 2" bottom clean out port, the Crystal Water D.E. Filter will provide years of trouble-free operation and crystal clear, sparkling water.

FEATURES

- 2 1/2" internal piping.
- Accepts 2 1/2", 2" and 1 1/2" plumbing. (Fittings incl.)
- Fiberglass reinforced polypropylene body for superior strength.
- "Multi-Handle" design.
- Heavy-duty tamper-proof clamp.
- Industry proven D.E. grids.
- "Start-Service" dial on pressure relief gauge.
- 2" bottom clean-out port.
- 2 1/2" hi-temp PVC slide valve available.
- Convertible to cartridge by simply changing internals.

Waterway

For replacement parts, see page 113.

Part No.	Description	Flow Rate	Pool Turnover 6-8 hours	Price

Cristal-Flo™

Cristal-Flo™

Features

- Typical Installations – Inground pools and water features (including fish ponds and water gardens)
- Quality Construction – Durable one-piece extra-thick molded polyethylene tank
- Safe – Internal air relief hole allows air to automatically escape, preventing high pressure buildup
- 6-Position Valve – Allows you to perform all necessary water movement functions. A transparent sight-glass adapter is included
- More Choices – Both 20" and 24" available with multi-functional 6- Position Valves.
- Large Drain Plug – Large drain plug is easy to get at for removing and installing by hand or with tools if required
- Sleek Looks – Contemporary style with a textured black finish that provides superior performance in all weather conditions

Triton II®

Triton®II

Features

- Heavy-duty closure provides easy inspection, and features an easy-to-read pressure gauge with air relief valve
- Swing-away diffuser allows instant access to sand and all internal parts
- All internal parts are threaded for ease of service
- Internal air bleed
- Bulkhead connectors are threaded for easy installation and service
- Combination sand and water drain makes servicing and winterizing fast and easy
- Maximum Operating Pressure 50 psi

Spider Gasket Replacement for Multiport Backwash Valves

1. Stop pump and release all pressure from system.
2. Place the selector handle at the "winterize" position (this lifts the plug off the seat).
3. Remove the nuts and bolts holding the cover to the valve body. Remove the cover assembly.
4. Remove the old gasket from the valve body.
5. Make sure that the gasket groove is free of water, grease, oils, debris and parts of the old gasket. Use alcohol to degrease.
6. **NOTICE:** Once this step is started, continue through Step 10 without interruption.

Using Loctite® 401, 403 and 416 OR 3M Scotch-Grip™ 4799 Industrial Adhesive, provided by Hayward, apply glue sparingly (a bead about 1/16" wide) to the bottom only (not the sides) of the spider groove in the valve body. The glue lines must be continuous and intersect at the intersections of the grooves.

7. Insert the new gasket into the groove with the rounded bead up. Press the gasket firmly into all groove areas to seat the new gasket evenly.
8. Align the tab on the cover assembly with pin on the valve body, fastening it with the bolts and nuts removed in Step 3. Tighten all bolts evenly.
9. Depress the valve handle and rotate it to the closest standard position (FILTER or RINSE), being careful not to rub the plug on the new gasket. Release the handle, allowing the plug to hold the gasket in place while curing.
10. Minimum cure time is 2 hours. Curing for 24 hours is recommended for full strength.
